

“ All the **Taco** products go together so well, you can build **quality comfort systems from the ground up.**”

– Paul McRoberts, President
IFH Designs and Installations
St. Marys, Ontario

Paul’s company, IFH (In-Floor-Heating), does a lot of radiant work. His slogan, “Kiss your cold feet goodbye” is smart marketing, and his choice of Taco is smart buying. “Every hydronic heating system, radiant or not, performs better with Taco products”, says Paul. “The versatile Radiant Mixing Block and X-Pump Block save us a lot of time on installations.”

That’s the idea, Paul. Taco’s in business to make your job easier and your hydronic systems the most comfortable and reliable in the industry. When happy customers come back to you, you come back to us.

Why not join the Taco Green Team and get the facts, support, and products you need to grow your business the way Paul has?
